TILT-UP RV MOUNT

Our RV Mount is a simple solution for mounting a single 60 cell or 72 cell PV module on the roof of an RV, trailer or other flat surface, or it can be staked to the ground for portable use.

- Accommodates a module with widths between 36 and 40 inches and length up to 73 inches
- Module can be tilted up when parked for maximum sun exposure, from 0° to 40°
- Low profile when folded flat to minimize wind resistance and chance of damage while driving.
- Manufactured using heavy-duty corrosion-resistant 5000 series aluminum and stainless-steel hardware
- Engineered for 90 mph wind speeds
- In Stock, UPS shippable

For assistance with your specific mounting needs, please visit us online or contact us via email at sales@tamaracksolar.com.
